

## **FIRST CHOICE** ClearCal™

*"True liquid" that removes silt from water*

### **What is ClearCal?**

ClearCal is a mixture of PAM (Polyacrylamides) and Liquid Calcium with a 0-0-0-6 Ca analysis. ClearCal is exclusive to WFS only.

### **What does ClearCal do?**

ClearCal drops the silt out of water preventing the dirt from reaching streams, ponds or sumps. Water penetration is increased and irrigation costs are minimized.

### **Does ClearCal work in all irrigation systems?**

ClearCal, a true liquid solution, works in all irrigation systems such as: furrow, sprinkler, micro and drip irrigation systems.

### **What are the benefits of ClearCal?**

- **Removes Silt from Water**  
*Keeps soil particles in fields not in drains/rivers*
- **Improves Soil Structure**  
*Increasing water penetration and enhances fertigation*
- **Reduces Salt Buildup**
- **Anticrustant**
-
