Benefits exceed cost: ROI = 6:1

***FIRST CHOICE T-PA** increases fertilizer availability during the critical physiological growth stages of the cotton plant.*

T-PA

Increases the availability of your foliar nutrients.

Increase in Pounds of Lint per Acre

FIRST CHOICE T-PA plus ESP 1-0-8 applied as a foliar increased yield substantially at each of the three rates of application. “The average increase of the foliar was **308 pounds of lint (19%)** more than the untreated control.”
