

# FIRST CHOICE

First Choice brand products are only offered by Western Farm Service. They have been tested by Western Farm Service agronomists and field representatives. It is our brand, so we are careful to put the First Choice logo only on products we think offer important values for our customers. We offer a full line of adjuvants, which are detailed on page 17. Below, we have highlighted some products that you may find useful in your operation. Check with your local Western Farm Service location or visit [www.westernfarmservice.com](http://www.westernfarmservice.com) for a complete label on these and other products.

**HopperFinder** is designed for mass trapping sucking insects such as whitefly, aphids, leafhoppers, etc. HopperFinder's bright yellow color attracts sucking insects and contains no pesticides. It is a 12-inch wide, non-toxic, UV resistant yellow plastic film. Coated on both sides with a non-drying, water resistant adhesive, HopperFinder holds pest until they die. Available as a 6" x 1500' roll.

### **First Choice Phortress 0-37-25 Plus Manganese and Zinc** is a

water-soluble fertilizer designed for foliar applications. It is high in phosphorus and potassium and helps the plant grow vigorously which helps it fend off disease. Available in a 2.5 gallon size.

**First Choice 20-9-9** Super Blend fertilizer is an all purpose fertilizer for container nurseries, turfgrass, ground covers, trees, shrubs and bedding plants. It is used as a top dress or pre-plant fertilizer. It contains both slow release Nitroform, and ammoniacal nitrogen for quick greening. Micronutrients and sulfur are included to provide plants with essential nutrients for growth. Available in 50# bags.

**First Choice 14-4-9** Palm Fertilizer is a fertilizer blend formulated to provide season long nutrition for all varieties of palms and tropical plants. It is high in manganese, sulfur and calcium which ensure optimal palm growth. It contains both slow release Nitroform, and ammoniacal nitrogen for quick greening. It can be used in nursery and landscape applications. Available in 50# bags.

**First Choice Keep 0-51-33** is a highly soluble, low salt index formulation developed to supplement standard soil fertility practices. It provides a readily available source of phosphorous and potassium during the plants growth season. Available in 50# bags.

**First Choice Ascend Nursery Turf Concentrate** is a liquid mycorrhizal soil inoculant. It can be used in soil and artificial media such as peat and coir based mixes. Available in many locations in bulk.

**First Choice Guano Plus** is "liquid compost". It is a fine filtered liquid carbon containing fertilizer and a microbial nutrient that significantly improves the effectiveness of conventional inorganic fertilizer programs.

Available in many locations in 5 gallon size and bulk.

# FIRST CHOICE

## CalMax

**First Choice Cal Max** is a water-soluble foliar nutritional fertilizer. It is high in Calcium and other micronutrients. It is applied as a stand-alone product or in tank mixes containing pesticides. Available in a 2.5 gallon size.

**Sluggo** controls snail and slugs. The active ingredient, iron phosphate, is exempt from the requirement for tolerance when used as a molluscicide in or on food commodities. Sluggo is a unique blend of iron phosphate and food grade attractants. It can be used around domestic animals and wildlife. After feeding on the bait, snails/slugs cease feeding on plants. Dead snail/slugs are generally not observed. Available in 25# and 50# bags.

## Adjuvants

Western Farm Service offers a complete line of adjuvants in our First Choice line of products. Adjuvants are defined in the following categories. There is one to meet most any grower need.

**Spreaders** – Products that increase the area that a droplet of a given volume of spray mixture will cover on a target.

**Stickers** – Products that assist the spray deposit to adhere or stick to the target and may be measured in terms of time, wind, water, mechanical action or chemical action.

**Penetrants** – Products that enhance the ability of an agrochemical to enter a substrate or penetrate a surface.

**Buffers** – Products that when contained in a solution, causes the solution to resist changes in pH.

**Acidifier:** A material added to spray mixtures to lower the pH.
