

ORGANIC OPTIONS

Western Farm Service is pleased to offer organic options for those growers that want to use CCOF / OMRI approved products. Below are a few of the many organic products that are available from our local branches.

Fertilizers

Peruvian Seabird Guano Pellets

This is a CCOF/OMRI approved organic fertilizer derived from the droppings of fish eating birds that live off the coast of Peru. This fertilizer is uncommonly rich in both nitrogen and phosphorus as well as moderate in its amounts of potassium, calcium and sulfur. The analysis is 12-12-2.5.

Biolizer Liquid Products

These CCOF/OMRI approved liquid fertilizers are 100% microbial digested fish and feather meal. Biolizer-XN is high in Nitrogen and Biolizer-RZ is high in Phosphorus. Both products are certified pathogen free and can be applied either on soil or injected into all types of irrigation systems including drip. They have an odor free formulation. The analysis are Biolizer-XN 6-.4-.2 and Biolizer-RZ 0-5-.7.

Organic Blood Meal and Seaweed based fertilizers are also available.

Herbicides

Matran is a CCOF/OMRI approved contact non-selective herbicide that offers effective control of broadleaf weeds and grasses. Its active ingredient is clove leaf oil. Mode of action is a cell membrane disrupter, which allows for kill of many weeds within hours of application.

Bio Weed is Corn Gluten. It is a pre-emergent herbicide.

Insecticides

Hexacide – an insecticide/miticide for use in horticulture crops against a broad range of pests.

Xentari – *Bacillus thuringiensis* used for worm control.

Ornazin* – Multi-use insecticide and can be used as a nematicide.

PyGanic is a pyrethrum insecticide.

Gnatrol – Fungus Gnat control.

JMS Stylet Oil

Fungicides

Rootshield HC Drench and Granules

Mycostop Biofungicide

JMS Stylet Oil is used for powdery mildew suppression. Labeled for roses and many vegetables.

Kaligreen – used for powdery mildew suppression.

Sporan – a broad spectrum fungicide with curative properties recommended for the control of many plant diseases.

Erase – powdery mildew suppression.
