

## Sluggo/Deadline MP Efficacy Comparison of Brown Garden Snail

Buzz Uber- Crop Inspection Service

**DEAD  
SNAILS**

*Comments from Researcher:*

The 7 DAT evaluation exhibited excellent control in the Sluggo @ 40#/acre. Efficacy tailed off considerably @ the 10, 20# /acre rates. Surprisingly, poor control was observed for Deadline MP's @ both the 7, 14 DAT evaluations. Uncertain for this failure. Overall, the trial data was very consistent with no mortality in the UTCs, therefore all mortality can be attributed to the bait treatments.
